

Carcoon®

SERVICE DOC-CFR

REPLACEMENT INSTRUCTIONS ACTIVATED CARBON FILTERS

Activated Carbon Filters have a service life of 8,000 hours continuous use (one year) and should be renewed at least every two years after initial commissioning.

Changing of the filters should only be attempted with the cover removed from the vehicle and the power supply disconnected.

Activated Carbon Filters are not harmful to the environment, nevertheless they should be disposed of in a responsible manner.

Remove primary outer filter

Remove inner filter mask

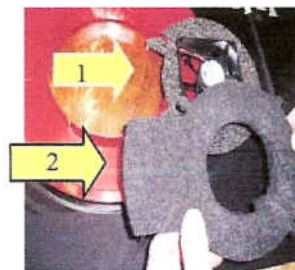

Push fan and filter forward from rear as shown

Separate filter from fan assembly

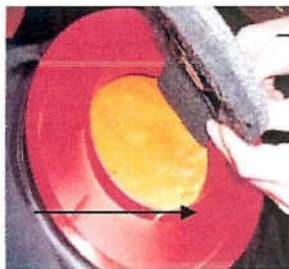

Align 1 and 2 As shown

Locate filter under each corner of the fan

Replace fan complete with new filter-from the front as shown

Align location lugs and press firmly into position

Check the reverse side. The filter should be flush with the surface

Replace the inner filter mask

Replace outer primary filter

Repeat process on second filter

Order replacement filters from you local dealer
